

Acronis

COMPARISON

Acronis Cyber Protect 15 Editions Comparison including Cloud deployment

Purpose-built to ensure 360-degree cybersecurity for businesses, Acronis' cyber protection solutions – Acronis Cyber Protect 15 and Acronis Cyber Backup 15 – deliver easy, efficient, reliable and secure cyber protection for all data and apps in on-premises and remote systems, in private and public clouds, and on mobile devices. Use this document to select the specific edition that fits your unique business needs and IT infrastructure requirements.

Overview

Acronis Cyber Protect 15 is available in multiple editions to serve the needs of various customer groups more precisely:

- **Acronis Cyber Backup 15 Standard** – Specially designed for SMB customers to back up data in on-premises or cloud Windows, Linux, VMware, Hyper-V or mixed heterogeneous small and medium environments. Protects data against ransomware and crypto miners.
- **Acronis Cyber Backup 15 Advanced** – Designed for enterprises utilizing larger environments with more users and more complex infrastructure. Includes data protection against ransomware and cryptomining and advanced backup features, such as: group management, shared protection plans, off-host data processing, tape support, deduplication, and customizable reporting.
- **Acronis Cyber Protect 15 Essentials** – Delivers essential cyber protection at an affordable cost to enable SMBs with lower cybersecurity budgets to protect their data. Includes basic file-level backup capabilities and essential cyber protection features, such as antivirus and antimalware protection, vulnerability assessment, patch management, and URL filtering.
- **Acronis Cyber Protect 15 Standard** – Designed for SMBs that need standard backup features, and multi-layered cyber protection against any threat. Includes the Acronis Cyber Backup Standard and the Acronis Cyber Protect Essentials features, plus additional cybersecurity capabilities such as data protection maps, URL filtering and categorization, continuous data protection, and HDD health.
- **Acronis Cyber Protect 15 Advanced** – Designed for enterprises utilizing larger, more complex environments. Includes advanced backup and cybersecurity capabilities, such as support for additional workloads, shared protection plans, backup notarization, safe recovery of backups, backup scan for malware, dashboard configuration, and security posture assessment.

Acronis Cyber Protect products introduce the industry's first integration of backup and cybersecurity, providing our customers with access to advanced, unique cyber protection features. Such features are marked in this document with the **UNIQUE FEATURE** tag.
