

Effortless password security for employees working from anywhere.

LastPass Business

When 80% of breaches are due to passwords,¹ people's own password practices remain the weakest point in a company's security and may be putting sensitive data at risk. While employees just want to work efficiently from anywhere, businesses need to ensure the proper security controls are in place.

For more than 70,000 businesses, LastPass reduces friction for employees while increasing control and visibility with a password management solution that is easy to manage and effortless to use. LastPass empowers employees to generate, secure, and share credentials seamlessly, while ensuring protection through LastPass' zero-knowledge security infrastructure.

In addition to password management, LastPass offers additional security features, such as single sign-on (SSO) with simplified access to up to three cloud applications and multi-factor authentication (MFA) that secures the LastPass vault and the configured single sign-on applications.

Frictionless employee experience

Simple and easy to use password manager to improve employee password hygiene and company security posture.

Convenient password sharing

Secure and flexible sharing for collaborative teams – from IT to marketing groups – while maintaining accountability. By using generated passwords and revoking access in real time, LastPass ensures that company data doesn't leave with departing employees.

Flexible, granular controls

With over 100 customizable security policies to choose from, the Admin Console is the command center for securing employee access across the organization.

Plug-and-play integrations

Through scalable, automated integrations with user directories, LastPass simplifies employee onboarding and offboarding by providing seamless integrations for Microsoft Active Directory, Microsoft Azure AD, OneLogin, and Okta.

High adoption, fast results

LastPass is not only easy to set up and maintain, but self-guided resources and built in dashboards also help admins with rollout and employee communications so businesses can achieve better results with no extra services required.

Actionable insights with Dark Web Monitoring

Stop worrying about data breaches. LastPass monitors your employees accounts and sends them an alert if information is compromised to keep their accounts safe.

Password management

Comprehensive security controls

Flexible integrations

Easy user management and reporting

Designed for security first

We're uncompromising when it comes to data security. User data is encrypted and decrypted at the device level so that the master password – and the sensitive data stored in LastPass – are kept secret, even from us.

Plus, you can augment security for LastPass accounts with multi-factor authentication.

These features deliver the control businesses require and the convenience users expect:

Central admin console	The admin dashboard offers automated user management, policies, diagnostic dashboards and more.
Universal password management	Simplify access to all apps as well as generate and automatically capture, store, and fill credentials for any login.
User directory integrations	Automate onboarding and offboarding, group management and more with AD, Azure AD, Okta, OneLogin, or a custom API.
100+ security policies	Enforce best practices and control password behavior across the business.
Detailed security reports	Tie actions to individuals with automated, detailed reporting that helps your business maintain compliance.
Secure password sharing	Give teams a flexible, safe way to share access to apps without sacrificing accountability or security.
Dark web monitoring	LastPass monitors your employees accounts and sends them an alert if information is compromised to keep their accounts safe.
Basic Single sign-on	Make critical business tools accessible to employees with simplified access to up to three cloud applications.
Basic Multi-factor authentication	Access to the LastPass Authenticator application to provide multi-factor authentication protection on the password vault and single sign-on applications.

Additional Offerings:

LastPass Advanced Single Sign-On	<p>LastPass Single Sign-On simplifies employee access to an unlimited number of cloud applications, while streamlining provisioning cloud applications for IT – all in the same application that they trust to store their passwords.</p> <p>With single sign-on for top priority apps, and password management to capture and secure everything else, LastPass protects every access point and conveniently connects employees to their work.</p>
LastPass Advanced Multi-Factor Authentication	LastPass Multi-Factor Authentication secures every access point to your business. From cloud and legacy apps to VPN and workstations, LastPass MFA offers passwordless access while maximizing security with customizable security policies and adaptive authentication technology. By adding LastPass MFA, your business can secure all web logins, while adding endpoint verification – all with one, easy-to-use mobile app.
